MCQ Test

COURSE NAME:

Software Testing

COURSE CODE: CSA37

COURSE OUTCOME COVERED

CO1: *Apply software testing principles to enhance the effectiveness of software quality assurance and improve defect detection strategies.*

Assessment Tool Weightage: 20%

Question 1: A team applies systematic test design techniques during development. This reflects:

a) Debugging b) Testing as an engineering activity c) Maintenance d) Deployment **Correct**

Answer: b) Testing as an engineering activity

Question 2: If a project skip defined testing processes, what is the likely outcome? a) Faster delivery with high-quality b) Increased defects in production c) Reduced testing cost only d) Improved documentation

Correct Answer: b) Increased defects in production

Question 3: Selecting test cases based on requirements demonstrates: a) Random testing b) Process-driven testing c) Ad hoc testing d) Maintenance testing

Correct Answer: b) Process-driven testing

Question 4: Applying equivalence partitioning is an example of: a) Debugging b) Test design technique c) Coding standard d) Deployment activity

Correct Answer: b) Test design technique

Question 5: A tester identifies missing requirements during testing. This shows: a) Coding error b) Process gap c) User error d) Hardware issue

Engineer to Excel

SAVEETHA

INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Correct Answer: b) Process gap

Question 6: Following a structured testing lifecycle ensures: a) Random defect detection b) Improved software quality c) Less documentation d) No defects

Correct Answer: b) Improved software quality

Question 7: Which activity best represents testing as a process? a) Writing code b) Executing test cases systematically c) Deploying software d) User training

Correct Answer: b) Executing test cases systematically

Question 8: A tester reuses test cases from a repository. This supports: a) Efficiency in testing b) Increased coding errors c) Reduced coverage d) Random testing

Correct Answer: a) Efficiency in testing

Question 9: If defects are tracked and analyzed, it improves: a) Coding speed b) Software quality process c) Deployment time d) User interface

Correct Answer: b) Software quality process

Question 10: Applying boundary value analysis helps to: a) Increase documentation b) Detect edge-case defects c) Reduce execution time d) Avoid testing

Correct Answer: b) Detect edge-case defects

Question 11: A tester validates system behavior against requirements. This is: a) Verification b) Validation c) Debugging d) Coding

Correct Answer: b) Validation

Question 12: Detecting defects before release reduces: a) Development effort b) Maintenance cost c) Coding standards d) Testing scope

Engineer to Excel

SAVEETHA

INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Correct Answer: b) Maintenance cost

Question 13: Applying testing principles ensures: a) Zero defects guarantee b) Early defect detection c) No testing needed d) Faster coding

Correct Answer: b) Early defect detection

Question 14: Which principle suggests testing all inputs is impossible? a) Exhaustive testing b) Exhaustive testing is impossible c) Early testing d) Defect clustering

Correct Answer: b) Exhaustive testing is impossible

Question 15: A tester focuses on frequently failing modules. This uses: a) Random testing b) Defect clustering principle c) Regression testing d) Smoke testing

Correct Answer: b) Defect clustering principle

Question 16: If testing starts early in SDLC, it helps: a) Reduce defects cost b) Increase coding errors c) Delay project d) Skip documentation

Correct Answer: a) Reduce defects cost

Question 17: A tester designs test cases independently from developers. This ensures: a) Bias b) Objectivity c) Delay d) Redundancy

Correct Answer: b) Objectivity

Question 18: A tester reviews requirements for errors. Role performed is: a) Developer b) Tester c) Manager d) User

Correct Answer: b) Tester

Question 19: Reporting defects clearly is part of: a) Coding b) Tester's responsibility c) Deployment d) Maintenance

Correct Answer: b) Tester's responsibility

Question 20: A tester collaborates with developers to fix bugs. This shows: a) Isolation b) Teamwork c) Delay d) Redundancy

Correct Answer: b) Teamwork

Question 21: A requirement of ambiguity causes defects. Origin is: a) Coding b) Requirements phase c) Testing phase d) Deployment

Correct Answer: b) Requirements phase

Question 22: Incorrect algorithm implementation leads to: a) Requirement defect b) Design defect c) Coding defect d) Testing defect

Correct Answer: c) Coding defect

Question 23: Missing validation checks are example of: a) Design defects b) Coding defects c) Requirement defects d) Deployment defects

Correct Answer: b) Coding defects

Question 24: Poor UI design causing confusion is: a) Coding defect b) Design defect c) Requirement defect d) Hardware defect

Correct Answer: b) Design defect

Question 25: A system crash due to memory leak is: a) Requirement defect b) Coding defect c) Design defect d) Documentation defect

Correct Answer: b) Coding defect

Question 26: Classifying defects based on severity helps: a) Ignore defects b) Prioritize fixing c) Delay release d) Increase cost

Engineer to Excel

SAVEETHA

INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Correct Answer: b) Prioritize fixing

Question 27: A critical defect impacts: a) Minor feature b) Core functionality c) UI color d) Documentation

Correct Answer: b) Core functionality

Question 28: A minor defect example is: a) System crash b) Login failure c) Typo error d) Data loss

Correct Answer: c) Typo error

Question 29: Defect classification helps testers to: a) Ignore bugs b) Organize defects c) Skip testing d) Increase errors

Correct Answer: b) Organize defects

Question 30: A defect repository is used to: a) Store code b) Store test cases c) Store defect details d) Store UI designs

Correct Answer: c) Store defect details

Question 31: Reusing defect data helps in: a) Predicting issues b) Increasing bugs c) Reducing tests d) Skipping phases

Correct Answer: a) Predicting issues

Question 32: A defect repository improves: a) Code complexity b) Testing efficiency c) User interface d) Deployment speed

Correct Answer: b) Testing efficiency

Question 33: Logging defects with details ensures: a) Confusion b) Traceability c) Delay d) Redundancy

Correct Answer: b) Traceability

Engineer to Excel

SAVEETHA

INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Question 34: A tester uses past defect data to design tests. This is: a) Random testing

b) Experience-based testing c) Debugging d) Deployment

Correct Answer: b) Experience-based testing

Question 35: Incorrect login validation is an example of: a) Functional defect b) Performance defect c) Security defect d) UI defect

Correct Answer: a) Functional defect

Question 36: Slow response time is a: a) Functional defect b) Performance defect c) UI defect d) Coding standard

Correct Answer: b) Performance defect

Question 37: Unauthorized data access indicates: a) UI defect b) Security defect c) Functional defect d) Design defect

Correct Answer: b) Security defect

Question 38: Missing button functionality is: a) Functional defect b) Security defect c) Performance defect d) Hardware defect

Correct Answer: a) Functional defect

Question 39: Poor alignment in UI is: a) Functional defect b) UI defect c) Security defect d) Design defect

Correct Answer: b) UI defect

Question 40: Applying testing principles avoids: a) Coding b) Redundant tests c) Deployment d) Maintenance

Correct Answer: b) Redundant tests

Question 41: A tester validates outputs using expected results. This is: a) Debugging b) Test execution c) Coding d) Maintenance

Engineer to Excel

SAVEETHA

INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Correct Answer: b) Test execution

Question 42: If defects are not tracked, it leads to: a) Better quality b) Poor traceability c) Faster delivery d) No impact

Correct Answer: b) Poor traceability

Question 43: Applying test process ensures: a) Random results b) Structured testing c) No defects d) No planning

Correct Answer: b) Structured testing

Question 44: Test case design based on requirements ensures: a) Low coverage b) High coverage c) No defects d) Less effort

Correct Answer: b) High coverage

Question 45: Early testing reduces: a) Defect cost b) Code size c) UI design d) Deployment time

Correct Answer: a) Defect cost

Question 46: A tester identifies repeated defects. This indicates a) Good design b) Poor process c) No issue d) Perfect testing

Correct Answer: b) Poor process

Question 47: Reviewing test results helps: a) Ignore defects b) Improve quality c) Skip testing d) Reduce effort

Correct Answer: b) Improve quality

Question 48: A tester applies regression testing to: a) Add features b) Ensure fixes work c) Deploy software d) Design UI

Correct Answer: b) Ensure fixes work

Question 49: Identifying root cause of defects helps: a) Increase bugs b) Prevent recurrence c)

Engineer to Excel

SAVEETHA

INSTITUTE OF MEDICAL AND TECHNICAL SCIENCES
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Delay testing d) Skip coding

Correct Answer: b) Prevent recurrence

Question 50: A test plan ensures: a) Random execution b) Organized testing c) No testing d) No defects

Correct Answer: b) Organized testing

Question 51: Applying defect classification improves: a) Testing cost b) Fix prioritization c) Coding errors d) UI design

Correct Answer: b) Fix prioritization

Question 52: A tester uses historical defect trends. This helps in: a) Ignoring defects b) Risk-based testing c) Deployment d) Coding

Correct Answer: b) Risk-based testing

Question 53: Testing ensures product meets: a) Developer needs b) User requirements c) Tester goals d) Manager plans

Correct Answer: b) User requirements

Question 54: A defect due to wrong requirement interpretation is: a) Coding defect b) Requirement defect c) UI defect d) Hardware defect

Correct Answer: b) Requirement defect

Question 55: Applying process standards ensures: a) Poor quality b) Consistent quality c) No testing d) Random output

Correct Answer: b) Consistent quality

Question 56: A tester documents defects clearly. This helps: a) Developers fix quickly b) Increase errors c) Delay release d) Reduce quality

Correct Answer: a) Developers fix quickly

Question 57: A defect repository is analyzed to: a) Increase cost b) Improve testing strategy c) Skip testing d) Reduce quality

Correct Answer: b) Improve testing strategy

Question 58: A tester applies black-box testing. This focuses on: a) Internal code b) External behavior c) Hardware d) Deployment

Correct Answer: b) External behavior

Question 59: Defects found in testing phase indicate: a) Perfect design b) Earlier phase issues c) No issues d) Hardware problems

Correct Answer: b) Earlier phase issues

Question 60: Applying structured testing improves: a) Random results b) Product reliability c) Coding errors d) Deployment delay

Correct Answer: b) Product reliability

RUBRICS FOR CALCULATION:

Criteria	Weightage (%)	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)
Conceptual Understanding	30%	Demonstrates thorough understanding; answers all questions accurately	Shows good understanding with few errors	Partial understanding; several incorrect responses	Lacks understanding; majority of answers incorrect
Accuracy of Answers	25%	All answers are correct	Most answers are correct with minor mistakes	Some correct answers; frequent errors	Mostly incorrect answers
Application of Knowledge	20%	Correctly applies concepts to problem-based questions	Applies concepts with minor errors	Limited ability to apply concepts	Unable to apply concepts
Time Management	15%	Completes quiz well within time efficiently	Completes on time with minor delays	Requires extra time or rushes through questions	Unable to complete within given time
Question Interpretation	10%	Interprets all questions correctly and responds appropriately	Misinterprets a few questions	Often misinterprets questions	Unable to understand questions
